Probability ranking on the 2021–2024 temporal holdout
ROC curves
True-positive rate
False-positive rate
Logistic Regression (AUC=0.73)
Decision Tree (AUC=0.78)
Random Forest (AUC=0.83)
No-discrimination reference
Precision–recall curves
Precision
Recall
Logistic Regression (AP=0.94)
Decision Tree (AP=0.93)
Random Forest (AP=0.96)
Test prevalence=0.85
Curves assess ranking across cutoffs; they do not select a final operational threshold. The positive class is poor financial risk.
